

Muhammad Nouman

Independent Full-Stack Engineer | Lahore, Pakistan | Remote projects and roles

noumandogar12@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

Full-stack engineer with 5+ years of professional experience and roots in Ruby on Rails and React. Currently working independently on projects, with a toolkit that includes Next.js, TypeScript, PostgreSQL, and AI-assisted development. Experience spans product ownership, distributed teams, integrations, database work, and code review.

CORE SKILLS

Application development: Ruby on Rails, React, Next.js, TypeScript, JavaScript, Node.js.

Data and delivery: PostgreSQL, Supabase, Redis, Sidekiq, Docker, GitHub Actions, AWS, RSpec.

AI-assisted workflow: Claude Code, Codex, Cursor; engineering review and testing.

Early mobile experience: Flutter and Dart during a 2019 internship.

PROFESSIONAL EXPERIENCE

Independent projects | Full-Stack Engineer | Current

Working independently on client projects and products across planning, implementation, review, and delivery. Open to new projects and remote engineering roles.

TribeAwl | Senior Software Engineer, Contract | Previous role

Worked on an electronic medical records platform and guided 5-6 remote developers. Contributions included billing, Stripe integrations, invoice calculations, interactive charts, code reviews, and technical mentorship.

GoatLeads | Senior Software Engineer | Aug 2025 - Feb 2026

Contributed to an insurance CRM, including feature development, migrations, background jobs, and a notes-system refactor. Used AI-assisted development while addressing maintainability, data integrity, and migration safeguards.

letsremotify | Senior Software Engineer | Jul 2023 - Jan 2025

Developed Rails applications, third-party integrations, and frontend features. Guided developers, reviewed code, and contributed to refactoring and server maintenance.

Devsinc | Software Engineer | Jan 2021 - Jun 2023

Built Rails and React applications, integrations, and automated tests. Worked on database associations, indexing, debugging, and application improvements.

Netsol - NSpire | Junior Developer Intern | Jul 2019 - Oct 2019

Gained hands-on Flutter and Dart experience while developing cross-platform mobile applications in Lahore.

Selected project experience

Responsibilities below distinguish independent product ownership from team contributions. Public website links are included where available.

TekHub | Sole full-stack engineer

Built a multi-tenant HR and payroll workspace with React, Rails, and PostgreSQL. Scope includes people, projects, leave, expenses, invoices, payroll, organization-level isolation, and role-based access. [Visit website](#)

GR Developers | Sole full-stack engineer

Built a real estate website with Next.js, TypeScript, and Supabase, including property discovery, lead capture, integrations, and search-focused landing pages. [Visit website](#)

BidCrafter | Product developer

Built an AI-assisted proposal product with job matching, personalized proposal drafts, campaign controls, user review, and pipeline tracking. [Visit website](#)

Lala G Timber Merchant | Website developer

Built a supplier website with timber and plywood categories, a material calculator, pricing references, and phone and WhatsApp inquiry paths. [Visit website](#)

GR Timber | Website developer

Built a timber supplier website connecting its product catalog, material estimator, rate information, and direct contact options. [Visit website](#)

TribeAwl | Senior engineer and team lead

Contributed to a medical records platform, billing improvements, interactive charting, and remote engineering leadership.

letsremotify | Senior engineer and team lead

Helped build a remote hiring platform, implemented features, reviewed code, and guided a team of 4-5 developers. [Visit website](#)

Test Rabbit | Lead developer

Led development from inception for a white-label assessment product with company and candidate dashboards, shared test links, and candidate-attempt review. [Visit website](#)

Concert Finance | Software engineer

Worked on CRM integrations, SQL-based payout workflows, and automated tests. Historical project experience; the product later transitioned to a newer version.

Languages: English (fluent).
